HOW TO USE YOUR BAKE IT BLUE TEST TUBE TRACKER

1. Add your QR code

Stick the QR code included in your pack in the space provided, so people can scan and donate straight to your fundraising page.

2. Set your fundraising goal

Write your total fundraising goal on the front where it says 'Our goal is: \$___'.

3. Fill in your progress totals

Add your milestone amounts beside the test tube so you can track your progress from your first donation all the way to your total raised.

4. Display your tracker

Display your tracker where lots of people will see it. The more people that see it, the more chances you have to receive donations and reach your goal!

5. Colour in the test tube as you raise money

Each time you receive a donation, colour in more of the test tube to show how close you are to reaching your goal.

Example:

If your goal is \$500, your progress totals could be:

First donation: \$50

Strong start: \$125

Half way: \$250

Almost there: \$375

Total Raised: \$500,
or whatever you end up raising on the day!
