

What you and your centre can do to help!

Jeans for Genes was created to raise money to help the scientists at Children's Medical Research Institute find treatments and cures for the 1 in 20 kids facing a birth defect or genetic disease.

You may think you don't know anyone with a genetic disease or birth defect, when in fact – there is one in every classroom across Australia! There are

conditions that you may not be aware of, but also more commonly known conditions like cystic fibrosis, autism and cancer.

You and your preschool, childcare or early learning centre can help make a difference in the lives of kids who shouldn't have to think about getting liver transplants, taking dozens of medications, or getting their next dose of chemotherapy. We believe all kids should have a chance to just be kids!

Jeans for Genes is formally the first Friday in August but you can fundraise any time during August!

There are lots of fun things you can do to raise money—from holding a denim mufti day and collecting donations to painting or decorating jeans or selling blue baked treats. We have some great decorations on our website to liven up your space!

Find out more at **JeansForGenes.org.au** or get in contact with our team at **info@jeansforgenes.org.au**

Understanding Genes - Genetic Traits

What other traits do you have? Think about...

Write them down:

Q

Eye colour

Skin colour

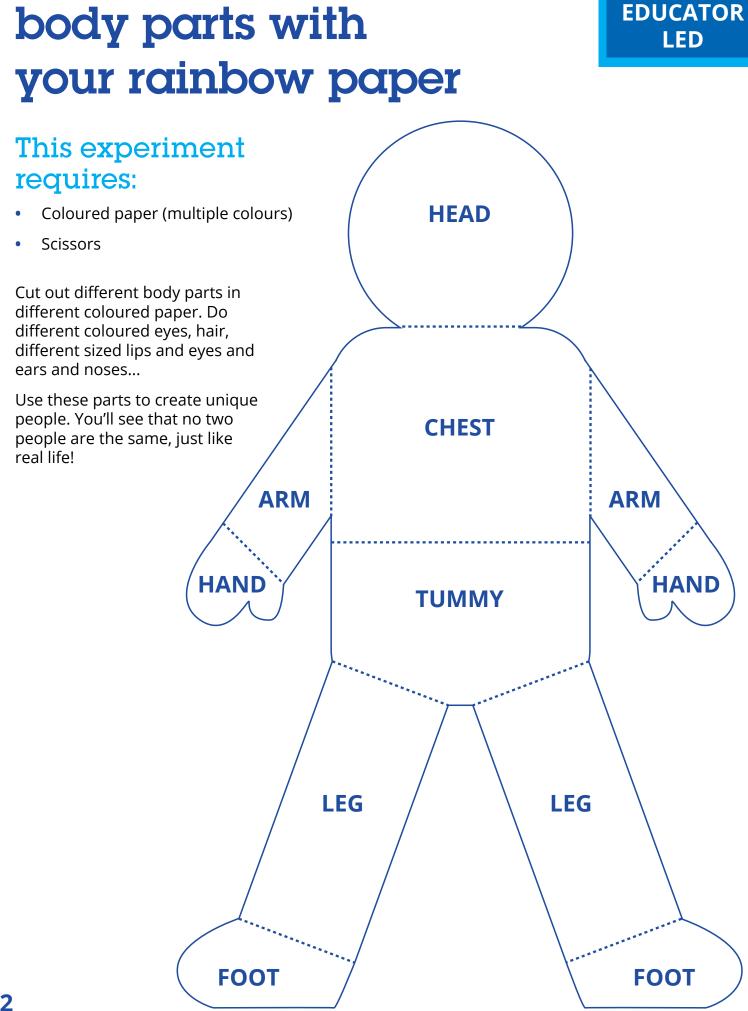

Freckles

Curly or straight hair

Dimples

Create different body parts with

Fine Motor Pipetting practice

This experiment requires:

- Conical tube (or smaller container)
- Squeezy pipette
- Culture plate
- Plastic beaker (or container)

This is available as a kit at shop.cmri.org.au (while stocks last)

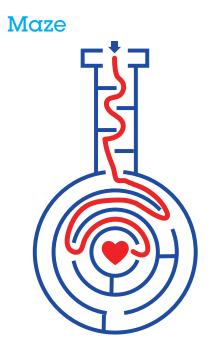

Get food colouring and dye some water. Kids can practice moving water from conical tube or beaker to culture plates using pipette only—no spilling!

Wear gloves for added difficulty in your practice.

See if you can draw a picture in your culture plate.
