

HOW LONG IS YOUR DNA?

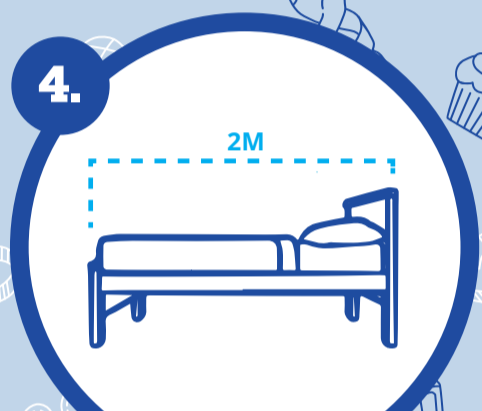

100km

10,000 genes long

10 million pages

2 metres

2000 Gigabytes

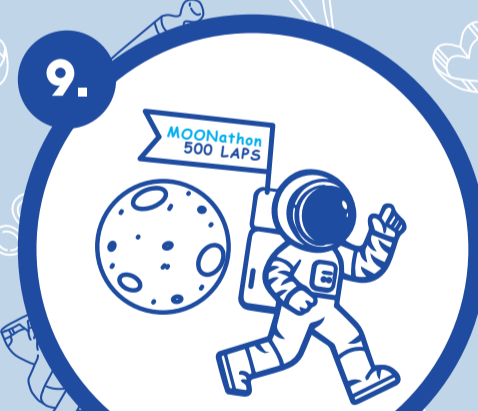

24 chromosomes

As wide as our solar system

1 billion nucleotides (or base pairs)

It could stretch from Earth to the Moon and back 500 times

HOW TO PLAY

1. Scan the QR code to make a donation of \$5 or more to enter. Guess which answer you think is correct and write your name under that answer (multiple people can choose the same answer)

Place QR code here

2. Once all players have selected their answer, the host reveals the answer
3. All the winners get bragging rights for the next month
4. All funds raised are donated to Children's Medical Research Institute

HOST TO SCAN the QR code to check the winning answer, then cut off corner (keep it safe).
